

LANDROVER, ALL TYPES

ENGINE SUPPORT BRACKET

UNIT WORK

INTRODUCTION

1. Spring washers, replacing "LOCKER, support bracket", are now used on current production vehicles to secure the engine support bracket to the cylinder block.

WORK INFORMATION

2. When WASHER, LOCK, single turn rectangular section, cad plated (5310-66-016-5993) is used in place of LOCKER, support bracket, it is important that the bolts be tightened to a torque figure of 80 lb ft.
